## ***Benefits of Membership***

➤ Access to Research & Innovation and the Ability to Participate in Research Projects

Since its inception, C-TEP has funded 40 applied research projects, in the areas of:

- Construction & Maintenance
- Freight/Truck Transportation
- Pavement & Roadway Design
- Road Safety
- Traffic Data Analysis & Engineering
- Transportation Planning

(Completed reports can be found on our website. [www.c-tep.com](http://www.c-tep.com) )

➤ Significant Discounts for Courses and Workshops

(For a typical 2 day training course, a member organization saves \$600 per attendee)

➤ Courses Qualify for Professional Development Credits

- In term of applied engineering content, C-TEP courses provide the most up to date engineering techniques in planning, designing, constructing and maintaining streets and highways, as well as bicycle, pedestrian and transit facilities.
- The amount of material covered in 2 to 3 days of a C-TEP short course often exceeds what would be presented in a 13 week University graduate course.
- C-TEP instructors come from practitioners in government, consulting and industry and can provide knowledgeable answers to questions dealing with current issues.

➤ Recent Courses & Workshops Offered

- Pavement design, Evaluation & Maintenance
- Highway & Urban Geometric Design
- Bio-Engineering/Streambank Stabilization
- Interchange Planning & Design
- Work Zone Traffic Control
- Safety Improvements on Alberta Roads & Streets
- Annual Western Canada Pavement Workshops
- Erosion & Sediment Control Manual (AT)
- Roundabout Planning & Design
- Road Safety Audits
- AASHTO Highway Safety Manual
- Project Management for Grading Base Paving Projects (AT)

➤ Networking Opportunities with Transportation Professionals

Consultants, Government Agencies, Contractors and Suppliers, through volunteering and becoming a part of C-TEP Committees, have an opportunity to develop and deliver courses and workshops on current topics and to host lunch & learn sessions.
